Sliding doors have been around for a while now, and they have had their fair share of challenges. For example, they are susceptible to door jamming issues. Switch things up by installing traditional French doors.

Why Replace Your Sliding Glass Door with a French Door?

Here are top four reasons why you should ditch your sliding glass door for a French door:

1. **Extra safety:** Sliding glass doors are easy to pick. Burglars simply pop them off their tracks and rollers. Hinged doors, however, have a sophisticated locking system for extra security.
2. **More appealing:** Many folks find patio doors more attractive to the sliding glass doors. They have numerous designs for a wide taste of options.
3. **Better functionality:** When clogged up with debris or rusty rollers, sliding doors can be hard to open. French doors, on the other hand, are easy to open and rarely wear out. They also seal better.
4. **Better energy efficiency:** Today's French doors are designed using high-performance frames with a double paned, 1-inch thick glass. The low E glass transmits solar heat four times better than that of sliding glass doors.

Cost of Replacing a Sliding Glass Door with a French Door

Your cost depends on the custom options you choose, and if there is a need to increase the door threshold. The glass pros at Energy Shield are well suited to install French doors in your living space, and we will be happy to go over details that can help you get your project done within budget. We also offer \$0 down, 0% interest financing O.A.C.

What to Expect?

1. After talking to one of our trained home improvement professionals, we schedule an in-house consultation.
2. Before arrival, we recommend that you take a thorough look at our online portfolio for design inspiration and a clear picture of how your French door might look.
3. Upon arrival, our team of professionals assesses your door replacement project. They take you through your custom and budget options.
4. We reach out within 24hours of your visit to provide upfront pricing and arrange a convenient return appointment to finish the job.
5. On our final visit, our certified experts replace the sliding glass door with our French doors. The task involves getting rid of the conventional slider and trim pieces, fitting the new door set, and making sure there is proper insulation and waterproof.
